JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Acetonitrile
Control of the electrochemical reduction of *o*-nitrophenol by pH imposition in acetonitrile (Baeza et al.) 121
AFM
AFM observation of surface activation of ruthenium oxide electrodes during hydrogen evolution (Chen et al.) 185
AlGaAs
Interfacial behaviour of quantum well electrode|electrolyte: effect of redox species on EER spectra of a single quantum well GaAs|-$Al_xGa_{1-x}As$ electrode (Liu et al.) 55
Alkaline solutions
Properties of thin, hydrous Pd oxide films (Birss et al.) 175
Analytical solution
Analytical solution for the steady-state diffusion and migration involving multiple reacting ions. Application to the identification of Butler–Volmer kinetic parameters for the ferri-/ferrocyanide redox couple (Bortels et al.) 139
Anodic dissolution
In situ observation of anodic dissolution process of p-GaAs(001) in HCl solution by surface X-ray diffraction (Uosaki et al.) 13
Aqueous
The aqueous electrochemistry of C_{60} and methanofullerene films (Davis et al.) 7
Aqueous solutions
On the mixed doping of fullerene films (Szücs et al.) 27
Atomic force microscopy
Electrochemical behavior of hexa-ammineruthenium(III) cations in clay-modified electrodes prepared by the Langmuir–Blodgett method (Hotta et al.) 107

Buckminsterfullerene
The aqueous electrochemistry of C_{60} and methanofullerene films (Davis et al.) 7
Butler–Volmer kinetics
Analytical solution for the steady-state diffusion and migration involving multiple reacting ions. Application to the identification of Butler–Volmer kinetic parameters for the ferri-/ferrocyanide redox couple (Bortels et al.) 139

Catalytic effect
Square wave catalytic stripping voltammetry of molybdenum complexed with dihydroxynaphthalene (Li, Smart) 169
Catalytic electrode process
The theory of catalytic electrode processes at a hemispherical ultramicroelectrode and its application for the catalytic behavior of the sixth reduction wave of fullerene, C_{60} (Diao, Zhang) 67
Cation distribution
Electrocatalytic activity of spinel related cobaltites $M_xCo_{3-x}O_4$ (M = Li, Ni, Cu) in the oxygen evolution reaction (Nikolov et al.) 157
Chronoamperometry
Chronoamperometric study of the reduction of chemisorbed thiols on Au(111) (Yang, Morin) 1

Clay-modified electrode
Electrochemical behavior of hexa-ammineruthenium(III) cations in clay-modified electrodes prepared by the Langmuir–Blodgett method (Hotta et al.) 107
Complex formation curves
Experimental and calculated complex formation curves for a labile metal–ligand system. A differential pulse polarographic study of the Pb(II)–(*N*,*N*,*N*′,*N*′-tetramethylethylenediamine)–OH system at fixed ligand to metal ratio and varied pH (Cukrowski, Adsetts) 129
Composites
Polypyrrole + polyacrylate composites, kinetic study (Otero, González-Tejera) 19
Copper coating
Effect of copper coating on the behaviour of p-InP electrodes (Sutter et al.) 101
Coulometry
Electrochemical behavior of hexa-ammineruthenium(III) cations in clay-modified electrodes prepared by the Langmuir–Blodgett method (Hotta et al.) 107
Cu
Electrocatalytic activity of spinel related cobaltites $M_xCo_{3-x}O_4$ (M = Li, Ni, Cu) in the oxygen evolution reaction (Nikolov et al.) 157
Cyanide solution
Preparation of a microelectrode array using desorption of a self-assembled monolayer of hexadecylthiolate on a gold electrode in cyanide solution (Ohtani et al.) 75
Cyanocobalamin
Electrochemical reactions of cyanocobalamin in acidic media (Zheng, Lu) 61
Cyclic voltammetry
Electrochemical reactions of cyanocobalamin in acidic media (Zheng, Lu) 61
Electrochemical behavior of hexa-ammineruthenium(III) cations in clay-modified electrodes prepared by the Langmuir–Blodgett method (Hotta et al.) 107
Cytosine
Voltammetric and sonovoltammetric studies on the oxidation of thymine and cytosine at a glassy carbon electrode (Oliveira Brett, Matysik) 95

Differential pulse polarography
Electrochemical reactions of cyanocobalamin in acidic media (Zheng, Lu) 61
Experimental and calculated complex formation curves for a labile metal–ligand system. A differential pulse polarographic study of the Pb(II)–(*N*,*N*,*N*′,*N*′-tetramethylethylenediamine)–OH system at fixed ligand to metal ratio and varied pH (Cukrowski, Adsetts) 129
Diffusion
Analytical solution for the steady-state diffusion and migration involving multiple reacting ions. Application to the identification of Butler–Volmer kinetic parameters for the ferri-/ferrocyanide redox couple (Bortels et al.) 139
Doping
On the mixed doping of fullerene films (Szücs et al.) 27

EER spectroscopy
Interfacial behaviour of quantum well electrode|electrolyte: effect of redox species on EER spectra of a single quantum well GaAs|-$Al_xGa_{1-x}As$ electrode (Liu et al.) 55
Electrochemical formation
Properties of thin, hydrous Pd oxide films (Birss et al.) 175
Electrochemistry
The theory of catalytic electrode processes at a hemispherical ultramicroelectrode and its application for the catalytic behavior of the sixth reduction wave of fullerene, C_{60} (Diao, Zhang) 67
Effect of copper coating on the behaviour of p-InP electrodes (Sutter et al.) 101
Control of the electrochemical reduction of *o*-nitrophenol by pH imposition in acetonitrile (Baeza et al.) 121
Electrodeposition
Effect of copper coating on the behaviour of p-InP electrodes (Sutter et al.) 101
Electropolymerization
Formation of conducting polyaniline coatings on iron surfaces by electropolymerization of aniline in aqueous solutions (Sazou, Georgolios) 81
ESR
Development in potential-modulated ESR technique (Zhuang, Lu) 115

Ferri-/ferrocyanide redox couple
Analytical solution for the steady-state diffusion and migration involving multiple reacting ions. Application to the identification of Butler–Volmer kinetic parameters for the ferri-/ferrocyanide redox couple (Bortels et al.) 139
Film electrochemistry
The aqueous electrochemistry of C_{60} and methanofullerene films (Davis et al.) 7
Fullerene
On the mixed doping of fullerene films (Szücs et al.) 27
The theory of catalytic electrode processes at a hemispherical ultramicroelectrode and its application for the catalytic behavior of the sixth reduction wave of fullerene, C_{60} (Diao, Zhang) 67

GaAs
Interfacial behaviour of quantum well electrode|electrolyte: effect of redox species on EER spectra of a single quantum well GaAs|-$Al_xGa_{1-x}As$ electrode (Liu et al.) 55
p-GaAs(001)
In situ observation of anodic dissolution process of p-GaAs(001) in HCl solution by surface X-ray diffraction (Uosaki et al.) 13
Gold single crystal
Chronoamperometric study of the reduction of chemisorbed thiols on Au(111) (Yang, Morin) 1
Growth mechanism
In situ impedance spectroscopy of silicon electrodes during the first stages of porous silicon formation (Popkirov, Ottow) 47

pH
Control of the electrochemical reduction of *o*-nitrophenol by pH imposition in acetonitrile (Baeza et al.) 121
pH dependence
Experimental and calculated complex formation curves for a labile metal–ligand system. A differential pulse polarographic study of the Pb(II)–(*N*,*N*,*N*′,*N*′-tetramethylethylenediamine)–OH system at fixed ligand to metal ratio and varied pH (Cukrowski, Adsetts) 129
2-Heptanone
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 2. Facilitated ion transfers (Cheng, Schiffrin) 37

Hexa-ammineruthenium(III) cations
Electrochemical behavior of hexa-ammineruthenium(III) cations in clay-modified electrodes prepared by the Langmuir–Blodgett method (Hotta et al.) 107
Hexadecylthiolate
Preparation of a microelectrode array using desorption of a self-assembled monolayer of hexadecylthiolate on a gold electrode in cyanide solution (Ohtani et al.) 75
High temperature aqueous solutions
Importance of thermal diffusion in high temperature electrochemical cells (Engelhardt et al.) 193
Hydrogen evolution
AFM observation of surface activation of ruthenium oxide electrodes during hydrogen evolution (Chen et al.) 185

Impedance spectroscopy
In situ impedance spectroscopy of silicon electrodes during the first stages of porous silicon formation (Popkirov, Ottow) 47
Properties of thin, hydrous Pd oxide films (Birss et al.) 175
Inhibition of corrosion
Formation of conducting polyaniline coatings on iron surfaces by electropolymerization of aniline in aqueous solutions (Sazou, Georgolios) 81
p-InP electrodes
Effect of copper coating on the behaviour of p-InP electrodes (Sutter et al.) 101
Interface behaviour
Interfacial behaviour of quantum well electrode|electrolyte: effect of redox species on EER spectra of a single quantum well GaAs|-$Al_xGa_{1-x}As$ electrode (Liu et al.) 55
Ion transfer
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 2. Facilitated ion transfers (Cheng, Schiffrin) 37
Iron electrode
Formation of conducting polyaniline coatings on iron surfaces by electropolymerization of aniline in aqueous solutions (Sazou, Georgolios) 81

Kinetics
Polypyrrole + polyacrylate composites, kinetic study (Otero, González-Tejera) 19

Langmuir–Blodgett method
Electrochemical behavior of hexa-ammineruthenium(III) cations in clay-modified electrodes prepared by the Langmuir–Blodgett method (Hotta et al.) 107
Lead
Experimental and calculated complex formation curves for a labile metal–ligand system. A differential pulse polarographic study of the Pb(II)–(*N*,*N*,*N*′,*N*′-tetramethylethylenediamine)–OH system at fixed ligand to metal ratio and varied pH (Cukrowski, Adsetts) 129
Li
Electrocatalytic activity of spinel related cobaltites $M_xCo_{3-x}O_4$ (M = Li, Ni, Cu) in the oxygen evolution reaction (Nikolov et al.) 157
Liquid|liquid interface
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 2. Facilitated ion transfers (Cheng, Schiffrin) 37

Mass transfer in tube and annulus
Importance of thermal diffusion in high temperature electrochemical cells (Engelhardt et al.) 193
Mechanism
On the mixed doping of fullerene films (Szücs et al.) 27
Methanofullerene
The aqueous electrochemistry of C_{60} and methanofullerene films (Davis et al.) 7

Microelectrode array
Preparation of a microelectrode array using desorption of a self-assembled monolayer of hexadecylthiolate on a gold electrode in cyanide solution (Ohtani et al.) 75
Migration
Analytical solution for the steady-state diffusion and migration involving multiple reacting ions. Application to the identification of Butler–Volmer kinetic parameters for the ferri-/ferrocyanide redox couple (Bortels et al.) 139
Molybdenum
Square wave catalytic stripping voltammetry of molybdenum complexed with dihydroxynaphthalene (Li, Smart) 169
Multiple reacting ions
Analytical solution for the steady-state diffusion and migration involving multiple reacting ions. Application to the identification of Butler–Volmer kinetic parameters for the ferri-/ferrocyanide redox couple (Bortels et al.) 139

Ni
Electrocatalytic activity of spinel related cobaltites $M_xCo_{3-x}O_4$ (M = Li, Ni, Cu) in the oxygen evolution reaction (Nikolov et al.) 157
o-Nitrophenol
Control of the electrochemical reduction of *o*-nitrophenol by pH imposition in acetonitrile (Baeza et al.) 121
N,N,N′,N′-Tetramethylethylenediamine
Experimental and calculated complex formation curves for a labile metal–ligand system. A differential pulse polarographic study of the Pb(II)–(*N,N,N′,N′*-tetramethylethylenediamine)–OH system at fixed ligand to metal ratio and varied pH (Cukrowski, Adsetts) 129
Non-aqueous electrolytes
Interfacial behaviour of quantum well electrode|electrolyte: effect of redox species on EER spectra of a single quantum well GaAs|-$Al_xGa_{1-x}As$ electrode (Liu et al.) 55

2-Octanone
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 2. Facilitated ion transfers (Cheng, Schiffrin) 37
Oxalic acid
Formation of conducting polyaniline coatings on iron surfaces by electropolymerization of aniline in aqueous solutions (Sazou, Georgolios) 81
Oxygen evolution reaction
Electrocatalytic activity of spinel related cobaltites $M_xCo_{3-x}O_4$ (M = Li, Ni, Cu) in the oxygen evolution reaction (Nikolov et al.) 157

Palladium oxide films
Properties of thin, hydrous Pd oxide films (Birss et al.) 175
Photo-desorption
Preparation of a microelectrode array using desorption of a self-assembled monolayer of hexadecylthiolate on a gold electrode in cyanide solution (Ohtani et al.) 75
Polyacrylate
Polypyrrole + polyacrylate composites, kinetic study (Otero, González-Tejera) 19
Polyaniline
Formation of conducting polyaniline coatings on iron surfaces by electropolymerization of aniline in aqueous solutions (Sazou, Georgolios) 81
Polypyrrole
Polypyrrole + polyacrylate composites, kinetic study (Otero, González-Tejera) 19
Porous silicon
In situ impedance spectroscopy of silicon electrodes during the first stages of porous silicon formation (Popkirov, Ottow) 47
Potential-modulated ESR
Development in potential-modulated ESR technique (Zhuang, Lu) 115
Preparation
Preparation of a microelectrode array using desorption of a self-assembled monolayer of hexadecylthiolate on a gold electrode in cyanide solution (Ohtani et al.) 75

Quantum well electrode
Interfacial behaviour of quantum well electrode|electrolyte: effect of redox species on EER spectra of a single quantum well GaAs|-$Al_xGa_{1-x}As$ electrode (Liu et al.) 55

Reduction
Control of the electrochemical reduction of *o*-nitrophenol by pH imposition in acetonitrile (Baeza et al.) 121
Ruthenium oxide electrodes
AFM observation of surface activation of ruthenium oxide electrodes during hydrogen evolution (Chen et al.) 185

Self-assembled monolayer
Preparation of a microelectrode array using desorption of a self-assembled monolayer of hexadecylthiolate on a gold electrode in cyanide solution (Ohtani et al.) 75
Sonoelectrochemistry
Voltammetric and sonovoltammetric studies on the oxidation of thymine and cytosine at a glassy carbon electrode (Oliveira Brett, Matysik) 95
Soret coefficient
Importance of thermal diffusion in high temperature electrochemical cells (Engelhardt et al.) 193
Speciation
Experimental and calculated complex formation curves for a labile metal–ligand system. A differential pulse polarographic study of the Pb(II)–(*N,N,N′,N′*-tetramethylethylenediamine)–OH system at fixed ligand to metal ratio and varied pH (Cukrowski, Adsetts) 129
Spectral subtraction
Development in potential-modulated ESR technique (Zhuang, Lu) 115
Spinel cobaltites
Electrocatalytic activity of spinel related cobaltites $M_xCo_{3-x}O_4$ (M = Li, Ni, Cu) in the oxygen evolution reaction (Nikolov et al.) 157
Stripping voltammetry
Square wave catalytic stripping voltammetry of molybdenum complexed with dihydroxynaphthalene (Li, Smart) 169
Structural properties
Properties of thin, hydrous Pd oxide films (Birss et al.) 175
Surface activation
AFM observation of surface activation of ruthenium oxide electrodes during hydrogen evolution (Chen et al.) 185
Surface X-ray diffraction
In situ observation of anodic dissolution process of p-GaAs(001) in HCl solution by surface X-ray diffraction (Uosaki et al.) 13

TEM
Properties of thin, hydrous Pd oxide films (Birss et al.) 175
TEMPO
Development in potential-modulated ESR technique (Zhuang, Lu) 115
Thermal diffusion
Importance of thermal diffusion in high temperature electrochemical cells (Engelhardt et al.) 193
Thiol self-assembled monolayer
Chronoamperometric study of the reduction of chemisorbed thiols on Au(111) (Yang, Morin) 1
Thymine
Voltammetric and sonovoltammetric studies on the oxidation of thymine and cytosine at a glassy carbon electrode (Oliveira Brett, Matysik) 95

Two-phase electrochemistry
A study of 2-heptanone and 2-octanone as solvents for two-phase electrochemistry. Part 2. Facilitated ion transfers (Cheng, Schiffrin) 37

Ultrasound
Voltammetric and sonovoltammetric studies on the oxidation of thymine and cytosine at a glassy carbon electrode (Oliveira Brett, Matysik) 95

Voltammetry
Voltammetric and sonovoltammetric studies on the oxidation of thymine and cytosine at a glassy carbon electrode (Oliveira Brett, Matysik) 95
